What do we do...

We work in the following areas:

- Handset Application (Mcops) – We have already launched Mcops, a device security application which protects the device from Physical theft as well as Data theft
- Finance Product (Mcops Finance Locker) - This product is already launched. It helps the retailers to secure their business of Handsets sold on Loan, against Bounced EMI's
- AI (Artificial Intelligence) – We aim to bring the sense of control to our users by helping them with remote access of their household appliances and belongings. We have launched a Personality Analysis and Predictive Software which helps users to choose the best career and personality development path based on the analysis of functioning of different parts of Brain
- IOT (Internet of Things) – We plan to use IOT, thereby, enabling our users to simplify and secure day to day live further
- We deliver the Software Development & Deployment services our customers need to modernize operations and drive innovation across Fintech, Consulting, People Development & Environmental Care.

Why Mcops Android security..

Our cutting edge features:

- Image of the intruder and location of intrusion is captured and shared.
- Forceful Shutdown of the Smartphone is disabled.
- GPS tracking of the lost Smartphone is done by mere text command
- SIM tracker notifies that the SIM has been removed and the information of the newly inserted SIM flows to the lost Smartphone's owner
- Camera operation can be operated remotely even after the device is lost.
- The data important to the User can be erased remotely after the device is stolen.
